Summary of Research Impact

I build a **sustainable** future for computing by enabling the **Internet of Batteryless Things**; a vision that liberates Internet of Things (IoT) devices from batteries thus allowing maintenance-free operation. I develop **system support** that cuts across the system stack to ensure **energy-efficient, reliable, and adaptive** program execution while making computational progress under frequent power failures. I actively look to apply my work in mobile health, education, smart cities, and environmental monitoring to unlock new **applications**.

15 publications including:

- **8** peer-reviewed conference papers
- **4** peer-reviewed journal papers
- **2** refereed poster abstracts

Citations: **191**   *numbers as of Nov. 12, 2023*

- h-index: **8**
- i10-index: **8**

My work has appeared in top computing conferences and journals: **ACM IMWUT, ACM SenSys, ACM IPSN, ACM SIGOPS EuroSys, ACM TECS** and **ACM TCPS**. Most of these venues are conferences with a very competitive acceptance rate of **14%-28%**. According to CORE 2020 conference rankings, I have **8** full peer-reviewed conference papers in A* or A international conferences. I released these systems as open-source to enable other researchers and practitioners.

As of Nov. 2023, Google Scholar reports a total of **191** citations, **85%** of which have been obtained after my year of graduation—**8** papers having more than **10** citations (i10-index) with the top cited paper having more than **50** citations.

As a postdoctoral researcher, I have also solo advised/mentored multiple Ph.D. students who published in these venues. I have also taught graduate-level courses with over 25 students in each course at Northwestern as well as LUMS. My research work was nominated for the best paper award (EWSN), invited to the Communications of ACM, GetMobile magazine for the SIGMOBILE research highlight, named a finalist for Fast Company's Innovation by Design Award, and covered by top media outlets such ACM Tech News, Forbes, Tech Crunch, Gizmodo, and many more. I was selected for the prestigious Alexandar Von Humboldt Postdoctoral fellowship in recognition of my work.
